Office Action Summary		Application No.	Applicant(s)	·				
		10/502,174	SCHOUHAMER II KORNELIS ANTO					
		Examiner	Art Unit					
	T. MAN W.O. DATE (1)	LAM T. MAI	2819					
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status

DETAILED ACTION

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claim 1 is objected to because of the following informalities: Claim 1 needs to rewrite for more clarity between the preamble and steps of the claim. Each step needs to be listed clearly to avoid 112 problems. Appropriate correction is required.

Claim 11 is objected to because of the following informalities: Claim 11 needs to rewrite for more clarity between the preamble and body of the claim. Each elements needs to be listed clearly to avoid 112 problems. Appropriate correction is required.

Claim 13 is objected to because of the following informalities: Claim 13 needs to rewrite for more clarity between the preamble and body of the claim. Each step/element needs to be listed clearly to avoid 112 problems. Appropriate correction is required.

Claim 17 is objected to because of the following informalities: Claim 17 needs to rewrite for more clarity between the preamble and mean of the claim. Each mean needs to be listed clearly to avoid 112 problems. Appropriate correction is required.

Allowable Subject Matter

Claim 1 is allowable if the claim is rewritten for more clarification of the claim as indicated above. The following is a statement of reasons for the indication of allowable subject matter: Limitation ".delivered code word is selected based on an additional criterion from the subset of code words excluding all code words not complying with said predetermined criterion and, in the event that a coding state of the second type has been established by the preceding code word, excluding all code words having a value of the predetermined parameter not corresponding to the established coding state of the

10/502,174

Art Unit: 2819

second type" is not taught or suggested in the prior art of record. Dependent claims 2-10 are allowable as well if claim 1 is allowed.

Claim 11 is allowable if the claim is rewritten for more clarification of the claim as indicated above. The following is a statement of reason for the indication of allowable subject matter. Limitation "m-to-n-bit converter (60) comprises means for providing for each information word an associated subset of code words comprising at least r second type of code words mutually differing in a predetermined way, and means for selecting a code word based on an additional criterion from the subset of code words excluding all code words not complying with said predetermined criterion and, in the event that a coding state of the second type has been established by the preceding code word, excluding all code words having a value of the predetermined parameter not corresponding to the established coding state of the second type" is not taught or suggested in the prior art of record. Dependent claim 12 is allowable as well if the claim 11 is allowed.

Claim 13 is allowable if the is rewritten for more clarification of the claim as indicated above. The following is a statement of reasons for the indication of allowable subject matter: Limitation "the preceding signal portion belongs to the group of the second type, excluding all signal portions having a value of the predetermined parameter not being associated with the respective information word, and the subset being associated to an information word and comprising at least r signal portions mutually differing in the value of the predetermined parameter" is not taught or

suggested in the prior art. Dependent claims 1-6 are allowable as well if the claim 13 is allowed.

Claim 17 is allowable if the rewritten for more clarification of the claim as indicated above. The following is a statement of reasons for the indication of allowable subject matter: Limitation "means for distinguishing the respective information word by evaluating a predetermined parameter of the following code word, characterized in that the converter comprises means for converting a code word selected from a subset of code words, the subset being associated to the information word and comprising at least r code words mutually differing in the value of the predetermined parameter" is not taught or suggested in the prior art. Dependent claim 18 is allowable as well if claim 17 is allowed.

Cited References

The prior art made of record and not replied upon is considered pertinent to application's disclosures. The cited references relate to instant application subject matter.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM T. MAI whose telephone number is (571)272-1807. The examiner can normally be reached on 5:30 am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Barnie Rexford can be reached on (571) 272-7492. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
